Type: ROUTINE INSPECTION  
Date: Mar-29-2007

### 2.40 (b) (4)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

(4) Adequate guidance to personnel involved in the care and use of animals regarding handling, immobilization, anesthesia, analgesia, tranquilization, and euthanasia; and

\*\* The records show that 16 dogs were euthanized in the year of 2006. The owner stated that some of the dogs were euthanized by the veterinarian. All dogs should be euthanized in a humane manner in accordance to AVMA guidelines, gun shot is not an approved method of routine euthanasia except in emergency situations. To be corrected by: 03-29-07

### 3.1 (a)

#### HOUSING FACILITIES, GENERAL.

(a) Structure; construction. Housing facilities for dogs and cats must be designed and constructed so that they are structurally sound. They must be kept in good repair, and they must protect the animals from injury, contain the animals securely, and restrict other animals from entering.

**\*\* One pen has openings in the front panel that allows for the dog to stick its head through the openings. The panel needs to be modified or replaced to eliminate the possibility of entrapment. All enclosures must protect the animals from injury and contain the animals securely. (Affects 1 dog) To be corrected by: 04-30-07.**

### 3.4 (c)

#### OUTDOOR HOUSING FACILITIES.

(c) Construction. Building surfaces in contact with animals in outdoor housing facilities must be impervious to moisture.

**\*\* The outdoor enclosures need to have the surfaces treated so as to be impervious to moisture. The wood is worn/weathered and no longer impervious to moisture. All surfaces in contact with the animals must be impervious to**

RYAN, IA 52330

### 3.1 (c) (3)

#### HOUSING FACILITIES, GENERAL.

##### (c) Surfaces--

(3) Cleaning. Hard surfaces with which the dogs or cats come in contact must be spot-cleaned daily and sanitized in accordance with Sec. 3.11(b) of this subpart to prevent accumulation of excreta and reduce disease hazards.

A thin layer of rust (residue from the water at the facility as per the undersigned facility designate) was present on the interior walls of the dog's primary enclosures during the time of inspection. All of the enclosures in the last breeding building were affected. All of the affected areas are accessible to the dogs. The undersigned inspector was able to scrape the rust off of the walls in two areas with his fingernail. This layer of rust provides an area for harmful bacteria and other disease causing hazards that affect dogs to accumulate as it can not be properly sanitized. These areas must thoroughly cleaned and santized to provide for the health and well-being of the animals.

To be corrected: 3-7-08

### 3.1 (f)

#### HOUSING FACILITIES, GENERAL.

(f) Drainage and waste disposal. Housing facility operators must provide for regular and frequent collection, removal, and disposal of animal and food wastes, bedding, debris, garbage, water, other fluids and wastes, and dead animals, in a manner that minimizes contamination and disease risks... Dead animals, animal parts, and animal waste must not be kept in food storage or food preparation areas, food freezers, food refrigerators, or animal areas.

A dead Cairn terrier was observed on the floor in the aisle of the last breeding building during the time of inspection. The undersigned facility designate indicated that he found the dead dog two days ago. Leaving deceased animals in the animal areas is not sanitary and poses a potential disease risk to the other animals. Remove the deceased dog and dispose of it properly. This shall be accomplished to provide for the health and well-being of the other animals at the facility.

To be corrected: 2-15-08

DIRECT NCI

### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

(b) Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include: (3) Daily observation of all animals to assess their health and well-being; Provided, however, That daily observation of animals may be accomplished by someone other than the attending veterinarian; and Provided, further, That a mechanism of direct and frequent communication is required so that timely and accurate information on problems of animal health, behavior, and well-being is conveyed to the attending veterinarian;

#### DIRECT NCI

1. A female Dachshund, microchip number 062058821, was observed to be very thin during the time of inspection. The hips and spine of the dog were easily visible and very pronounced. Additionally, a hernia was present on the left lower abdomen. The undersigned licensee indicated that she had not yet contacted her veterinarian to communicate these health problems. These health problems, if left untreated, could progress. All problems of animal health, behavior, and well-being must be communicated to the veterinarian in a timely manner. This shall be accomplished to assure that the animals are receiving prompt care according to the currently accepted veterinary professional standards.

2. A female Golden Retriever, microchip number 063538564, was observed with a lump, approximately 2 cm in diameter, on the top of her head during the time of inspection. The lump, soft to the touch as per the undersigned licensee, was located on the top, left side of her head approximately three cm above her left eye. The licensee has not contacted her veterinarian regarding this problem. All problems of animal health, behavior, and well-being must be communicated to the veterinarian in a timely manner. This shall be accomplished to assure that the animals are receiving prompt care according to the currently accepted veterinary professional standards.

To be corrected: By the close of business on 2-5-08

### 2.40 (a) (1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

(a) Each dealer or exhibitor shall have an attending veterinarian who shall provide adequate veterinary care to its animals in compliance with this section.

(1) Each dealer and exhibitor shall employ an attending veterinarian under formal arrangements. In the case of a part-time attending veterinarian or consultant arrangements, the formal arrangements shall include a written program of veterinary care and regularly scheduled visits to the premises of the dealer or exhibitor.

\*\* The last documented visit to the facility by the attending veterinarian (AV) was on 1/15/05. Each dealer and exhibitor shall employ an attending veterinarian under formal arrangements. In the case of a part-time attending veterinarian or consultant arrangements, the formal arrangements shall include a written program of veterinary care and regularly scheduled visits to the premises of the dealer or exhibitor. Correct by 8/31/06.

### 2.40 (b) (1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

(b) Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include:

(1) The availability of appropriate facilities, personnel, equipment, and services to comply with the provisions of this subchapter.

\*\* The licensee performs surgical dewclaw removals and tail dockings (with written AV approval). The equipment used for these procedures was shown to APHIS personnel (the facility inspector and his supervisor), and consisted only of unsterilized, rusted wire cutting pliers coated with organic material and debris. If unassisted surgeries (ie; in the absence of an attending veterinarian or other medical professional) is to be undertaken at this facility, proper equipment such as, but not limited to, sterilizing solutions, stainless steel or sterilizable instruments and instrument receptacles, sharp, disposable cutting blades or appropriate sharpening equipment for non-disposable equipment, surgical gloves, and an area with clean, sanitizable surfaces where surgeries may be performed will be required before this practice will be allowed to continue. Without these basic needs, the threat of injury or disease risk to any animal undergoing a surgical procedure at this facility cannot be minimized. Correct immediately on this business day (8/8/06), and do not engage in any surgical procedures until such time as adequate equipment and facilities are

### 2.40 (a) (1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

PVC NONE - 2.40(a) (1)

\* The facility does not have a Program of Veterinary Care (Form 7002). The facility must employ a consulting veterinarian. The formal arrangements shall include a written program of veterinary care and regularly scheduled visits to the premises of the dealer or exhibitor.

### 2.40 (b) (2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

MATTED HAIR-2.40(b)(2)

\* At time of inspection approximately 15 dogs had severely matted coats, some were with fecal matter. The dogs' skin could not be visualized and the ability to see was impaired due to the heavy matting. This condition could promote and foster skin infections because of the trapped debris and moisture and the lack of air circulation. The applicant must remove the matted hair from these dogs. A program of coat maintenance must be established to ensure that excessive hair matting does not occur.

### 3.1 (a)

#### HOUSING FACILITIES, GENERAL.

Sec. 3.1 Housing facilities, general. (a) Facilities and Operating Standards(a) Structure; construction. Housing facilities for dogs and cats must be designed and constructed so that they are structurally sound. They must be kept in good repair, and they must protect the animals from injury, contain the animals securely, and restrict other animals from entering.

\* At time of inspection there was 1 primary enclosure containing 2 dogs that had a hole approximately 4 x 2 in. on the right side of the doorway. There was a raised dog enclosure containing 6 large dogs in the barn building that had structural defects - 2 broken/missing middle support legs. There was a raised outdoor enclosure containing 2 Rottweilers that had a missing corner panel that attached the run to the doghouse that was large enough for animals

MILTON, IA 52570

Date: Jun-23-2008

### 3.1 (c) (2)

#### HOUSING FACILITIES, GENERAL.

3.1 (c)(2) Maintenance and replacement of surfaces. All surfaces must be maintained on a regular basis. Surfaces of housing facilities—including houses, dens, and other furniture-type fixtures and objects within the facility—that cannot be readily cleaned and sanitized, must be replaced when worn or soiled

\* The doorframes on 2 of the shelter structures containing 6 dogs are excessively chewed exposing bare, splintered wood. These surfaces are worn and cannot be readily cleaned and sanitized. The licensee must repair or replace all areas of chewed, bare wood and thus are no longer impervious to moisture and thus cannot be properly cleaned and sanitized. The licensee must repair or replace these areas of worn wood to allow for proper sanitization.

\* To be corrected by 7/7/08.

### 3.6 (a) (2)

#### PRIMARY ENCLOSURES.

3.6(a)(2)(xi) Provide sufficient space to allow each dog and cat to turn about freely, to stand, sit, and lie in a comfortable, normal position, and to walk in a normal manner; and

\*\* The primary enclosures for 6 dogs were not of sufficient size to allow the dog to turn about freely, to stand, sit, and lie in a comfortable, normal position, and to walk in a normal manner. Licensee must ensure that all primary enclosures have sufficient space to allow each dog to turn about freely, to stand, sit, and lie in a comfortable, normal position, and to walk in a normal manner.

\*\* To be corrected by 7/7/08.
